## 1.1 Data Structures

Here are the data structures with brief descriptions:

Character											 							 	 						5
Input .																			 						5
Level .																		 	 						6
Map											 								 						6
Sound											 							 	 						7

Data Structure Index

# **Chapter 2**

# File Index

## 2.1 File List

Here is a list of all documented files with brief descriptions:

const.h		
file o	Contient les constantes du programme	9
file.c	Fonctions d'acces au fichiers	10
file.h		
file level	21	11
file_level		14
game.c		
	Contient les fonction liées au jeu	18
game.h	Header de game.c	23
image.c	rieduel de game.c	
J	Contient les fonction liées aux images	28
image.h	Outline to feed the life and in the	00
input c	· · · · · · · · · · · · · · · · · · ·	29 32
input.h		??
•		33
map.c		
mon h	Contient les fonction liées au chargement et à l'affichage de la carte	34
map.h	Header de map.c	36
menu.c		
	Contient les fonction liées au menu	39
menu.h	Header de menu.c	39
menu le		00
_		41
menu_le		
player.c	Menu gerant le choix du niveau	42
piayon.o	Contient les fonction pour manipuler le joueur	44
player.h		
abara b	Header de player.c	47
share.h	Gestion des fichiers de carte	52
		-

4 File Index

sound.c		
	Contient les fonction pour jouer du son	55
sound.h	Header de sound.c	57
text.c	Contient les fonction pour afficher du texte à l'écran	59
text.h	Header de text e	60

## **Chapter 3**

## **Data Structure Documentation**

## 3.1 Character Struct Reference

#### **Data Fields**

- SDL\_Surface \* spriteR
- SDL\_Surface \* spriteL
- SDL\_Rect location
- int isRight
- int isOnGround
- int isJumping
- · int life

#### 3.1.1 Field Documentation

#### 3.1.1.1 int is Jumping

indique si le perso est au sol

#### 3.1.1.2 int isOnGround

indique la direction de regard du personnage (1 droite, 0 gauche)

#### 3.1.1.3 int life

0 when not, height remaning between character and max height if jumping

The documentation for this struct was generated from the following file:

player.h

## 3.2 Input Struct Reference

#### **Data Fields**

- char key [SDLK\_LAST]
- int quit

The documentation for this struct was generated from the following file:

• input.h

#### 3.3 Level Struct Reference

#### **Data Fields**

- unsigned char \*\* map
- int width
- int height
- int timer\_level
- char background [TAILLE\_MAX\_NOM\_FICHIER]
- char music [TAILLE\_MAX\_NOM\_FICHIER]

The documentation for this struct was generated from the following file:

· const.h

## 3.4 Map Struct Reference

Collaboration diagram for Map:

#### **Data Fields**

- Level \* IvI
- int xScroll
- int screenWidth
- int screenHeight

The documentation for this struct was generated from the following file:

· const.h

3.5 Sound Struct Reference 7

## 3.5 Sound Struct Reference

#### **Data Fields**

- FMOD\_SYSTEM \* sys
- FMOD\_SOUND  $\ast$  sound
- $\bullet \ \mathsf{FMOD\_CHANNELGROUP} * \mathbf{channel}$

The documentation for this struct was generated from the following file:

• sound.h

Data	Struc	+	Daai	ıman	tation
vala	อแนน	lure	DUC	umen	lalion

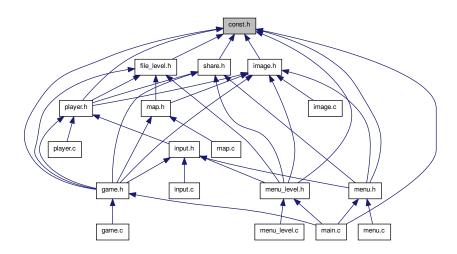

## **Chapter 4**

## **File Documentation**

#### 4.1 const.h File Reference

contient les constantes du programme

This graph shows which files directly or indirectly include this file:

#### **Data Structures**

- struct Level
- struct Map

#### **Macros**

- #define TAILLE\_BLOC 16
- #define NB\_BLOCS\_LARGEUR 60
- #define NB\_BLOCS\_HAUTEUR 33
- #define LARGEUR\_FENETRE TAILLE\_BLOC \* NB\_BLOCS\_LARGEUR
- #define **HAUTEUR\_FENETRE** TAILLE\_BLOC \* NB\_BLOCS\_HAUTEUR
- #define FPS 60
- #define TAILLE\_MAX\_NOM\_FICHIER 100

- #define TAILLE\_SAUT 17
- #define MARGE SCROLLING 2
- #define POURCENTAGE\_DEPLACEMENT 0
- #define TILE\_MAX 8

#### **Enumerations**

- enum { VOID =0, GRASS1 =1, GROUND1 =2, GREY\_WALL =3 }
- enum { RIGHT, LEFT, UP, DOWN }

#### 4.1.1 Detailed Description

contient les constantes du programme

**Author** 

Xavier COPONET

Date

2014-02-27

#### 4.2 file.c File Reference

Fonctions d'acces au fichiers.

#include "file.h"
Include dependency graph for file.c:

file.c
file.c
file.h
stdio.h stdlib.h errno.h

#### **Functions**

- FILE \* openFile (char nom[], char mode[])
- int closeFile (FILE \*ptr\_fichier)
- int readFileSize (FILE \*ptr\_fichier)

4.3 file.h File Reference

#### 4.2.1 Detailed Description

Fonctions d'acces au fichiers.

Author

Remi BERTHO

Date

15/03/14

#### 4.2.2 Function Documentation

4.2.2.1 int closeFile ( FILE \* ptr\_fichier )

Ferme le fichier

**Parameters** 

in	*ptr_fichier	le fichier
----	--------------	------------

#### Returns

entier 0 si tout s'est bien passe, 1 sinon

#### 4.2.2.2 FILE \* openFile ( char nom[], char mode[] )

Ouvre un fichier a partir de son nom (nom[]) et du mode voulu (mode[])

#### **Parameters**

in	nom[]	le nom du fichier
in	mode[]	le mode voulu

#### Returns

un pointeur sur le fichier ouvert, NULL s'il y a eut un probleme

4.2.2.3 int readFileSize ( FILE \* ptr\_fichier )

Lis la taille du fichier

Parameters

TII TO THOUSE	in	*ptr_fichier	le fichier
---------------	----	--------------	------------

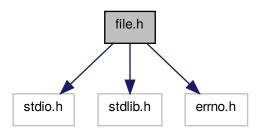

#### Returns

entier ayant la taille du fichier

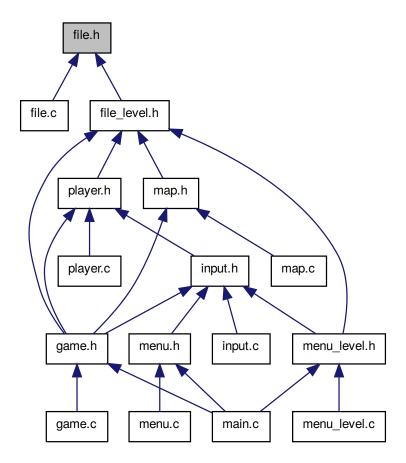

#### 4.3 file.h File Reference

Prototypes des fonctions d'acces aux fichiers.

```
#include <stdio.h>
#include <stdlib.h>
#include <errno.h>
Include dependency graph for file.h:
```

This graph shows which files directly or indirectly include this file:

4.3 file.h File Reference

#### **Functions**

- FILE \* openFile (char nome[], char mode[])
- int closeFile (FILE \*ptr\_fichier)
- int readFileSize (FILE \*ptr\_fichier)

#### 4.3.1 Detailed Description

Prototypes des fonctions d'acces aux fichiers.

**Author** 

Remi BERTHO

Date

15/03/14

#### 4.3.2 Function Documentation

4.3.2.1 int closeFile ( FILE \* ptr\_fichier )

Ferme le fichier

**Parameters** 

in	*ptr_fichier	le fichier
----	--------------	------------

#### Returns

entier 0 si tout s'est bien passe, 1 sinon

#### 4.3.2.2 FILE\* openFile ( char nom[], char mode[] )

Ouvre un fichier a partir de son nom (nom[]) et du mode voulu (mode[])

#### **Parameters**

in	nom[]	le nom du fichier
in	mode[]	le mode voulu

#### Returns

un pointeur sur le fichier ouvert, NULL s'il y a eut un probleme

4.3.2.3 int readFileSize ( FILE \* ptr\_fichier )

Lis la taille du fichier

**Parameters** 

in	*ptr_fichier	le fichier

#### Returns

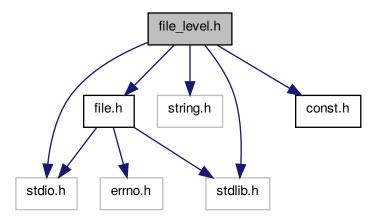

entier ayant la taille du fichier

## 4.4 file\_level.h File Reference

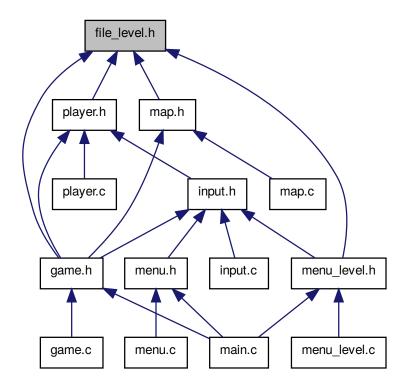

#### Gestion des fichiers de carte.

```
#include <stdio.h>
#include <stdlib.h>
#include <string.h>
#include "file.h"
#include "const.h"
```

Include dependency graph for file\_level.h:

This graph shows which files directly or indirectly include this file:

#### **Macros**

- #define TAILLE\_MAX\_NB\_BLOCS\_LARGEUR 5
- #define TAILLE\_MAX\_NB\_BLOCS\_HAUTEUR 4
- #define TAILLE\_BUFFER 2

#### **Functions**

- Level \* openLevel (char \*file\_name)
- void closeLevel (Level \*IvI)
- Level \* initLevel (Level \*IvI)
- void writeLevel (char \*file\_name, Level \*IvI)
- char \*\* readLevelFile (int \*nb\_lvl)
- void closeLevelList (char \*\*level\_names, int nb\_lvl)

#### 4.4.1 Detailed Description

Gestion des fichiers de carte.

#### **Author**

Remi BERTHO

Date

15/03/14

Version

1.0

#### 4.4.2 Function Documentation

4.4.2.1 void closeLevel ( Level \* IvI )

Ferme un niveau

**Parameters** 

out	lvl	le niveau
-----	-----	-----------

4.4.2.2 void closeLevelList ( char \*\* level\_names, int nb\_lvl )

Desalloue la liste des noms de niveau

#### **Parameters**

in,out	level_names	la liste des noms de niveau
in	nb_lvl	le nombre de niveau

#### 4.4.2.3 Level\* initLevel ( Level \* IvI )

Initialise un niveau en supposant que sa largeur et sa hauteur sont deja dans le niveau

#### **Parameters**

out // le niveau	0115	lvl	
------------------	------	-----	--

Returns

un pointeur sur le niveau

4.4.2.4 Level\* openLevel ( char \* file\_name )

Ouvre un fichier map, et le stocke

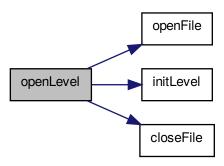

#### **Parameters**

in	file_name	le nom du fichier

#### Returns

un pointeur sur le niveau

Here is the call graph for this function:

#### 4.4.2.5 char\*\* readLevelFile ( int \* $nb_lvl$ )

Lis le fichier level

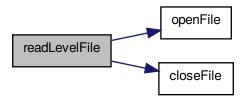

#### **Parameters**

out	nb_lvl	le nombre de niveau
-----	--------	---------------------

#### Returns

un pointeur sur la liste des niveaux cree

Here is the call graph for this function:

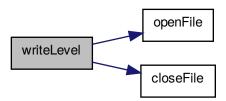

4.4.2.6 void writeLevel ( char \* file\_name, Level \* IvI )

Ecrit le niveau dans un fichier

#### **Parameters**

in	lvl	le niveau
in	file_name	le nom du fichier

Here is the call graph for this function:

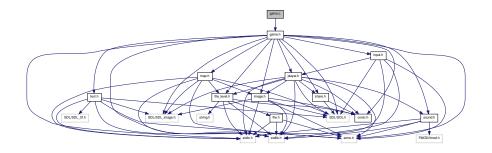

## 4.5 game.c File Reference

contient les fonction liées au jeu

#include "game.h"

Include dependency graph for game.c:

#### **Functions**

- void play (SDL\_Surface \*screen, char \*level\_name)
- void printGameOver (SDL\_Surface \*screen, int \*continuer, Input \*in)
- void **move** (int move\_left, int move\_right, Character \*player, Map \*m, float speed, int \*acceleration)
- void updateSpeed (float \*speed, int acceleration)
- void printPause (SDL\_Surface \*screen, Input \*in, int \*time, int \*continuer)
- Uint32 decomptage (Uint32 intervalle, void \*parametre)

#### 4.5.1 Detailed Description

contient les fonction liées au jeu

Author

Xavier COPONET

Date

2014-02-27

### 4.5.2 Function Documentation

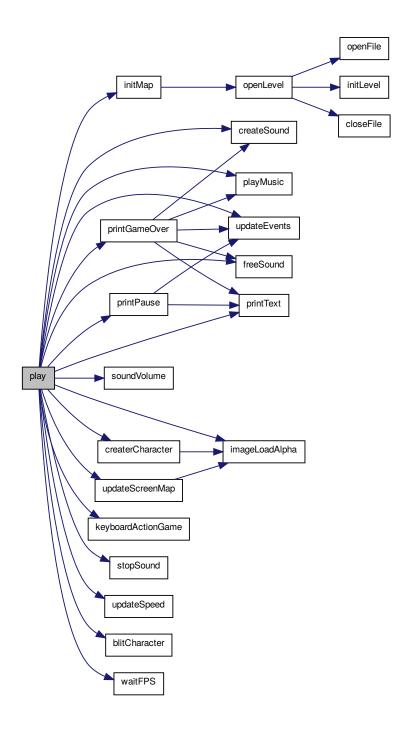

4.5.2.1 void play ( SDL\_Surface \* screen, char \* level\_name )

contient la boucle principale du jeu qui appelle les fonctions

#### **Parameters**

in,out	screen	L'écran de jeu
in	lvel_name	le nom du niveau

Here is the call graph for this function:

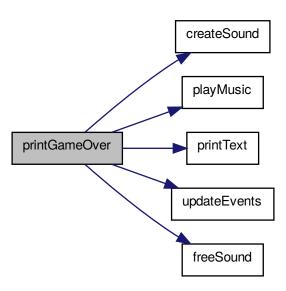

4.5.2.2 void printGameOver ( SDL\_Surface \* screen, int \* continuer, Input \* in ) affiche le message de game overflow\_error

#### **Parameters**

out	screen	l'écran de jeu
-----	--------	----------------

Here is the call graph for this function:

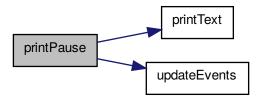

4.5.2.3 void printPause ( SDL\_Surface \* screen, Input \* in, int \* time, int \* continuer )

#### Met en pause le jeu

#### **Parameters**

out	screen	l'écran de jeu
out	time	le temps restant
in	in	la structure input
out	le	booléen de main loop de la fonction jouer

Here is the call graph for this function:

4.5.2.4 void updateSpeed ( float \* speed, int acceleration )

Met a jour la vitesse

#### **Parameters**

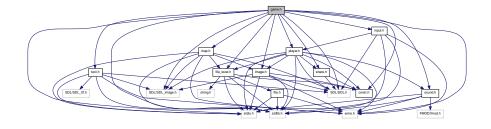

out	float	la vitesse
out	acceleration	l'acceleration

## 4.6 game.h File Reference

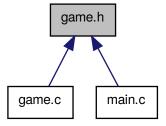

#### header de game.c

```
#include <stdlib.h>
#include <stdio.h>
#include <errno.h>
#include <SDL/SDL.h>
#include <SDL/SDL_image.h>
#include "const.h"
#include "text.h"
#include "sound.h"
#include "share.h"
#include "player.h"
#include "file_level.h"
#include "image.h"
#include "map.h"
#include "input.h"
```

Include dependency graph for game.h:

This graph shows which files directly or indirectly include this file:

#### **Functions**

- void play (SDL\_Surface \*screen, char \*level\_name)
- void printGameOver (SDL\_Surface \*screen, int \*continuer, Input \*in)
- void **move** (int move\_left, int move\_right, Character \*player, Map \*m, float speed, int \*acceleration)
- void updateSpeed (float \*speed, int acceleration)
- void printPause (SDL\_Surface \*screen, Input \*in, int \*time, int \*continuer)
- Uint32 decomptage (Uint32 intervalle, void \*parametre)

#### 4.6.1 Detailed Description

header de game.c

**Author** 

Xavier COPONET

Date

2014-02-27

#### 4.6.2 Function Documentation

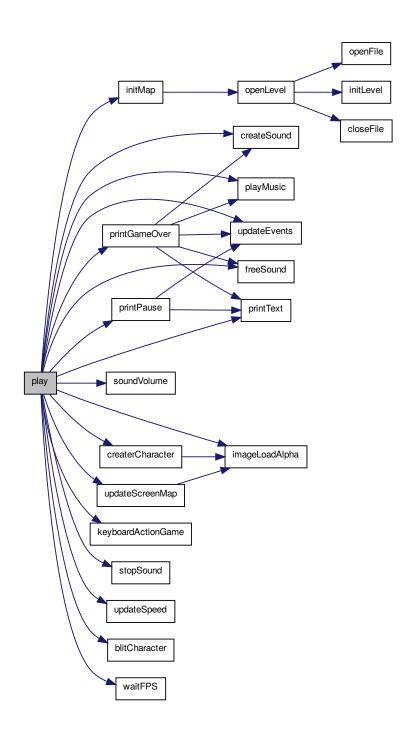

4.6.2.1 void play ( SDL\_Surface \* screen, char \* level\_name )

contient la boucle principale du jeu qui appelle les fonctions

#### **Parameters**

in,out	screen	L'écran de jeu
in	lvel_name	le nom du niveau

Here is the call graph for this function:

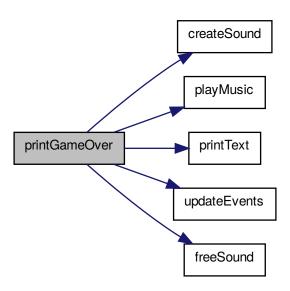

4.6.2.2 void printGameOver ( SDL\_Surface \* screen, int \* continuer, Input \* in ) affiche le message de game overflow\_error

#### **Parameters**

out	screen	l'écran de jeu

Here is the call graph for this function:

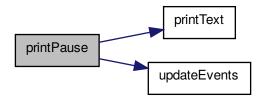

4.6.2.3 void printPause ( SDL\_Surface \* screen, Input \* in, int \* time, int \* continuer )

### Met en pause le jeu

#### **Parameters**

out	screen	l'écran de jeu
out	time	le temps restant
in	in	la structure input
out	le	booléen de main loop de la fonction jouer

Here is the call graph for this function:

4.6.2.4 void updateSpeed ( float \* speed, int acceleration )

Met a jour la vitesse

#### **Parameters**

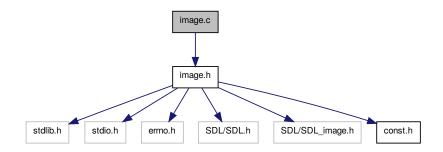

out	float	la vitesse
out	acceleration	l'acceleration

## 4.7 image.c File Reference

contient les fonction liées aux images

#include "image.h"

Include dependency graph for image.c:

#### **Functions**

- SDL\_Surface \* imageLoad (char \*file\_name)
- SDL\_Surface \* imageLoadAlpha (char \*file\_name)

### 4.7.1 Detailed Description

contient les fonction liées aux images

Author

Rémi BERTHO

Date

2014-02-27

#### 4.7.2 Function Documentation

4.7.2.1 SDL\_Surface \* imageLoad ( char \* file\_name )

Charge une image

#### **Parameters**

in	file_name	le nom du fichier
----	-----------	-------------------

#### Returns

un pointeur sur une SDL\_Surface

```
4.7.2.2 SDL_Surface * imageLoadAlpha ( char * file_name )
```

# Charge une image

#### **Parameters**

in	file_name	le nom du fichier

#### Returns

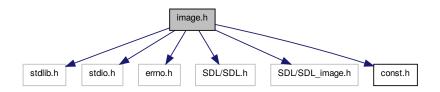

un pointeur sur une SDL\_Surface

# 4.8 image.h File Reference

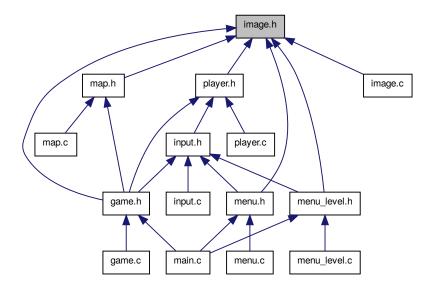

#### contient les fonction liées aux images

```
#include <stdlib.h>
#include <stdio.h>
#include <errno.h>
#include <SDL/SDL.h>
#include <SDL/SDL_image.h>
#include "const.h"
```

Include dependency graph for image.h:

This graph shows which files directly or indirectly include this file:

#### **Functions**

- SDL\_Surface \* imageLoad (char \*file\_name)
- SDL\_Surface \* imageLoadAlpha (char \*file\_name)

# 4.8.1 Detailed Description

contient les fonction liées aux images

**Author** 

Rémi BERTHO

Date

2014-02-27

# 4.8.2 Function Documentation

4.8.2.1 SDL\_Surface\* imageLoad ( char \* file\_name )

Charge une image

**Parameters** 

in	file_name	le nom du fichier
----	-----------	-------------------

#### Returns

un pointeur sur une SDL\_Surface

4.8.2.2 SDL\_Surface\* imageLoadAlpha ( char \*  $file\_name$  )

Charge une image

#### **Parameters**

in	file_name	le nom du fichier
----	-----------	-------------------

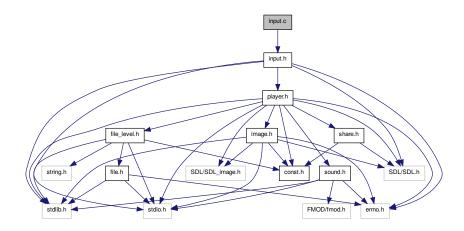

# Returns

un pointeur sur une SDL\_Surface

# 4.9 input.c File Reference

#include "input.h"

Include dependency graph for input.c:

#### **Functions**

- int updateEvents (Input \*in)
- void keyboardActionGame (Input \*in, int \*move\_left, int \*move\_right, int \*jump, int \*pause, Character \*player)
- int updateWaitEvents (Input \*in)
- void keyboardActionMenu (Input \*in, int \*cursorPos, int \*play\_level, int nb\_lvl)

# 4.9.1 Detailed Description

**Author** 

Xavier COPONET

Date

2014-03-18

#### 4.9.2 Function Documentation

4.9.2.1 void keyboardActionGame ( Input \* in, int \* move\_left, int \* move\_right, int \* jump, int \* pause, Character \* player )

perform action command by keyboard action

4.10 main.c File Reference 33

#### **Parameters**

in	in	the input structure
out	move_left	the left movement boolean
out	move_right	the right movement boolean
out	jump	the jump boolean
out	pause	the pause boolean
in	player	the Player

4.9.2.2 void keyboardActionMenu ( Input \* in, int \* cursorPos, int \* play\_level, int nb\_lvl )

perform action command by keyboard action

#### **Parameters**

in	in	the input structure
out	cursorPos	cursor position
out	play_level	boolean about playing the level or quit to title screen
in	nb_lvl	the number of levels

# 4.9.2.3 int updateEvents ( Input \*in )

recuperate keyboard input with a SDL\_PollEvent

#### **Parameters**

out	in	the input structure
-----	----	---------------------

# Returns

1 if a key is activated

#### 4.9.2.4 int updateWaitEvents ( Input \* in )

recuperate keyboard input with a SDL\_WaitEvent

#### **Parameters**

out	in	the input structure

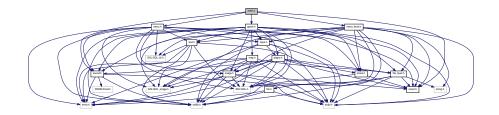

# Returns

1 if a key is activated

# 4.10 main.c File Reference

## 4.11.2 Function Documentation

4.11.2.1 Map \* initMap ( SDL\_Surface \* screen, char \* level\_name )

initialise la carte

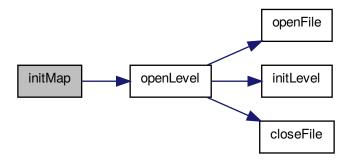

#### **Parameters**

in	screen	l'écran de jeu
in	level_name	le nom du niveau

#### Returns

un pointeur sur la carte initialisée

Here is the call graph for this function:

4.11.2.2 void scrolling ( Map \* m, int direction, float speed )

effectue un scrolling

**Parameters** 

in,out	тар	Le niveau à gérer
in	direction	La direction de scrolling
in	speed	la vitesse de scrolling

## 4.11.2.3 void updateScreenMap ( SDL\_Surface \* screen, Map \* m, char \* tileset )

met à jour l'écran avec les données de la carte (ignore les personnages)

#### **Parameters**

in,out	screen	of the game
in	Мар	*m The map
in	tileset	IvI tileset

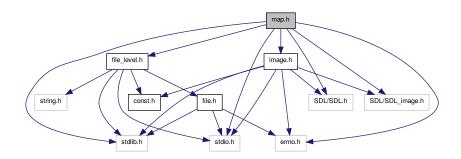

Here is the call graph for this function:

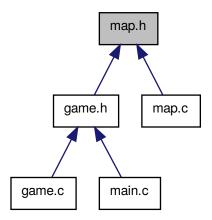

# 4.12 map.h File Reference

## 4.17.2 Function Documentation

4.17.2.1 void blitCharacter (SDL\_Surface \* screen, Character \* c, Map \* m)

blit le personnage à l'écran

**Parameters** 

in,out	screen	L'écran

in	С	Le personnage
in	т	la carte du jeu

# 4.17.2.2 int collisionSprite ( SDL\_Rect r, Map \* m )

détermine s'il y a collision entre une sprite et le décor

#### **Parameters**

in	r	le SDL_Rect correspondant à la sprite
in	т	la carte contenant le décor

#### Returns

1 s'il y a collision ou si en dehors du monde, 0 sinon

# 4.17.2.3 Character \* createrCharacter ( char \* spR, char \* spL )

# créer un personnage

#### **Parameters**

in	spR	l'adresse de la sprite droite
in	spL	l'adresse de la sprite gauche

#### Returns

le pointeur sur la structure créée

Here is the call graph for this function:

4.17.2.4 void moveCharacter ( Character \* c, int direction, Map \* m, float speed )

déplace le personnage selon la direction

# **Parameters**

in,out	С	Le personnage
in	direction	La direction du déplacement
in	т	la carte sur laquelle le personnage se déplace

in	speed	la vitesse de déplacement

#### Returns

1 si le personnage a pu se deplacer normalement, 0 s'il a fallut affiner

Here is the call graph for this function:

4.17.2.5 void movementVector (int direction, int \* vx, int \* vy, int speed, Character \* c)

#### create a movement vector

## **Parameters**

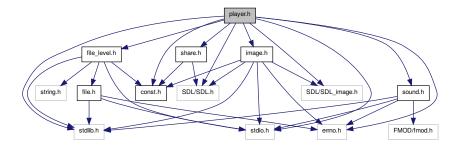

in	direction	The movement's direction
out	VX	the horizontal component of the vector
out	vy	the vertical component of the vector
in	speed	the speed of the move
out	С	the Character you have to move

# 4.18 player.h File Reference

X sign

## 4.18.3 Function Documentation

4.18.3.1 void blitCharacter (SDL\_Surface \* screen, Character \* c, Map \* m)

blit le personnage à l'écran

#### **Parameters**

in,out	screen	L'écran
in	С	Le personnage
in	т	la carte du jeu

#### 4.18.3.2 int collisionSprite ( SDL\_Rect r, Map \* m )

détermine s'il y a collision entre une sprite et le décor

#### **Parameters**

in	r	le SDL_Rect correspondant à la sprite
in	т	la carte contenant le décor

#### Returns

1 s'il y a collision ou si en dehors du monde, 0 sinon

4.18.3.3 Character\* createrCharacter ( char\*  $\mathit{spR}$ , char\*  $\mathit{spL}$ )

créer un personnage

#### **Parameters**

in	spR	l'adresse de la sprite droite
in	spL	l'adresse de la sprite gauche

#### Returns

le pointeur sur la structure créée

Here is the call graph for this function:

4.18.3.4 int moveCharacter ( Character \*c, int direction, Map \*m, float speed )

déplace le personnage selon la direction

#### **Parameters**

in,out	С	Le personnage
in	direction	La direction du déplacement
in	т	la carte sur laquelle le personnage se déplace
in	speed	la vitesse de déplacement

# Returns

1 si le personnage a pu se deplacer normalement, 0 s'il a fallut affiner

Here is the call graph for this function:

4.18.3.5 void movementVector (int direction, int \* vx, int \* vy, int speed, Character \* c )

create a movement vector

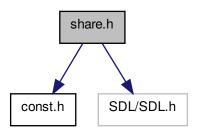

#### **Parameters**

in	direction	The movement's direction
out	VX	the horizontal component of the vector
out	vy	the vertical component of the vector
in	speed	the speed of the move
out	С	the Character you have to move

# 4.19 share.h File Reference

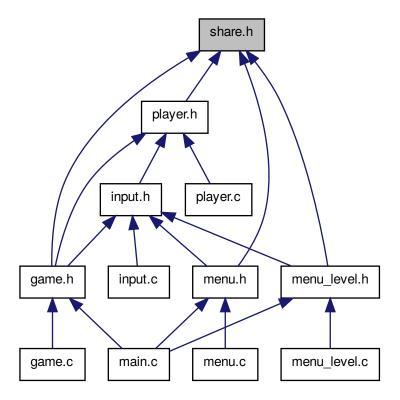

Gestion des fichiers de carte.

# 4.20.2 Function Documentation

4.20.2.1 sound \* createSound (void)

créer une structure son

Returns

la structure son

# 4.20.2.2 void freeSound ( Sound \*s )

release the sound

#### **Parameters**

out	s	the sound

# 4.20.2.3 void playMusic ( Sound \*s, char \*file )

lit un fichier long (musique)

#### **Parameters**

in,out	s	la structure son que l'on manipule
in	file	Le fichier son à lire

# 4.20.2.4 void playMusicOnce ( Sound \* s, char \* file )

lit un fichier long une fois

#### **Parameters**

in,out	S	la structure son que l'on manipule
in	file	Le fichier son à lire

# 4.20.2.5 void soundVolume ( Sound \* s, float volume )

set the sound volume

## **Parameters**

out	s	the sound
in	volume	the sound volume : [0.0 : no sound ; 1.0 (default) max power]

# 4.20.2.6 void stopSound ( Sound \* s )

stop the sound

# **Parameters**

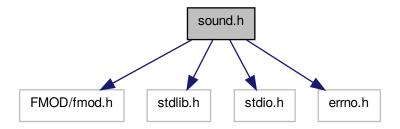

out	the	sound to stop

# 4.21 sound.h File Reference

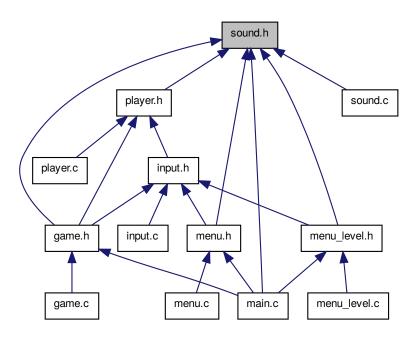

#### header de sound.c

```
